Mr. Joseph E. Snyder, President
Color Corporation of America
Tampa, Florida

Dear Mr. Snyder:

Your letter of 6 July to Mr. Dulles concerning "The Photographs in Space" program has been referred to me and I would like to suggest some publications which may prove useful to you. The Rand Corporation of Santa Monica, California, published some of their findings in Rand P-1935, "On the Basis of the Moon Photographs—More Data, Photographs and Speculation," 10 February 1960.

Earlier, a Rand staff prepared the "Space Handbook: Astronautics and its Applications" as a Staff Report of the House Select Committee on Astronautics and Space Exploration, U.S. Government Printing Office, Washington: 1959. In the forward listing of people who worked on the Space Handbook are the names of many technical people who might be considered in connection with your program. For your convenience, I am enclosing a copy of the Space Handbook. You will also notice that all through the Handbook are footnotes which list the names of workers and other references which could provide additional leads.

We appreciate your courtesy in writing to us and we wish you and the organizations you represent every success at the Chicago meeting.

Sincerely,

Signed
